☐Y__ Leaderboard

**** add any approved student-designed features you implemented below ****

☐Y__ Wildcard Item

18. Wildcard item. When you collect the item, it can apply any powerup/powerdown effect (heal, poison, speed boost, score multiplier, spawn an enemy, grant a tool, etc.), chosen at random.

☐Y__ Input Scrambler Item

10. An item that, when picked up, temporarily "confuses" the user's inputs (ex. When the nav switch is pushed up, the character moves left). This should assign new mappings at random and "confuse" all inputs.

☐Y__ Character Sprite Switcher Button

17. One of the buttons can be used to change the character design each time it is pressed. Requires at least 3 different character avatar sprites.

☐Y__ Item Pop-up Screen

8. Pop-up screen for when you pick up new items, like the key or when the teleporter spawns. The screen should have dialogue and persist until the user dismisses it.
